Mickey Soltys

Mickey is the administrator for the Course Evaluations system. Course Evaluations is a customizable, online product for delivering instructor and course evaluations. This involves managing user accounts for faculty, staff, and students, delivering the appropriate survey instrument/report to the appropriate user according to their role, and providing technical support.

Mickey also oversees the grading of exams given using Scantron sheets as well as harvesting other types of data from Scantrons. He is also administrator for the department's Ubuntu Linux development server.
